## React Developer

Front-end developer with proven ability to design and develop JavaScript-based applications for web or mobile environments. Strong knowledge of React JS, jQuery, Angular, Vue JS, HTML, CSS, and Bootstrap. Experienced in all stages of interface component design, from conception to final testing and deployment of web-responsive applications.

### Key Skills

User Interface (UI) Design	Performance Testing	Troubleshooting and Debugging
Software Development Lifecycle (SDLC)	Root Cause Analysis	Project Management
Cross-Functional Collaboration	Prototyping and Wireframing	Problem-Solving Skills

### Professional Experience

#### React Developer

Company One, Denver, CO

20XX to Present

- Develop front-end features, components, and libraries, translating designs and wireframes into high-quality, reusable code optimized for maximum performance across various web-capable devices and browsers.
- Demonstrate ability to lead and contribute to technical discussions, participating in and facilitating daily stand-ups, bi-weekly sprint planning, and sprint retrospectives.
- Conduct code reviews to ensure alignment with architectural principles and coding standards across the project lifecycle.
- Analyze requirements and create detailed specifications for program development, partnering with architects and development team to design, code, test, debug, document, and maintain software and applications.

#### Front-End Developer

Company Two, Raleigh, NC

20XX to 20XX

- Designed and developed responsive, mobile-optimized interfaces and websites aligned with user experience requirements.
- Partnered with cross-functional teams of back end developers, graphic designers, and marketing teams to ensure consistency with brand standards. Demonstrated versatility, working with APIs and supporting back-end teams.
- Wrote, edited, and deployed original applications, built new components, and enhanced existing features, creating efficient, maintainable code to improve speed, scalability, reliability, and functionality.
